

MOCCASIN SIZE CHART

Sizes in columns A and B are in Australian sizing.

The general rule for Eweniq Moccasins is one full size down to what a female would normally wear in shoe size, and a full size up to what a male would normally wear in shoe size. (This is because there is a 2 size difference between men's and women's shoe sizes!)

Following the chart below will give you a firm fitting moccasin which will then stretch to a nice fit.

A comfortable fit to start with will result in a very sloppy slipper. If this is what you would prefer, please go an extra size up, to what is suggested on the guide below.

This Moccasin Size Chart should only be used as a guide.

It ultimately comes down to what is comfortable for you!
